Summary

Fullstack developer (MERN) Experienced in developing and deploying realtime web applications using React, Node.js, Express and MongoDB. Currently working as Associate Software Developer at Cyberbells building RESTful services, integrating 3rd party APIs. Intensive Fullstack training at Masai School combined with B.tech in Information Technology (CGPA 8.05). Experienced in working across the stack , from designing clean React UI , to building backend and schemas.

EDUCATION

Bachelors of Technology - Information Technology, 2021 – 2025
GGSIPU Delhi
CGPA- 8.05

Full Stack Web Development, Masai School 01/2025 – 11/2025
Delhi

Professional Experience

Associate Software Developer, Cyberbells 04/2026 – Present
Chandigarh

- Integrated Tookan delivery APIs enabling 100+ stores without in-house riders to fulfill customer orders
- Built CAB file import/export for stores to manage catalogues, customers, menus, outlets, and regions
- Independently migrated 100+ client stores including settings and configurations from legacy DB to production platform using Python
- Designed RESTful APIs with authentication, request validation, and error handling for internal-external service communication

PROJECTS

PlanVerse, React, Tailwind CSS, Vite

- Built a frontend web application that helps users discover hotels, attractions, and events for a selected location.
- Implemented an AI-assisted trip planning flow that generates travel plans based on user-defined factors such as location, preferences, and duration.
- Focused on user experience by structuring travel information clearly and guiding users through the planning process.

Windstream, ReactJs, NodeJs, ExpressJs, MongoDB, Tailwind Css

- Developed a multi-page task management system using the MERN stack, incorporating pages for task dashboards, team management, etc.
- Built a dynamic and responsive front end with ReactJs, ensuring an intuitive user interface for managing tasks and team activities.
- Designed and implemented RESTful APIs using Node.js and Express to facilitate seamless communication between the front end and MongoDB database.

TECHNICAL SKILLS

Frontend

HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap

Database

MongoDb, PostgreSQL

Backend

Node.js, Express.js, Golang, Java, Python

Tools

Git, Postman, VSCode, npm, Linux

CS Fundamentals

DSA, Algorithm Analysis, OSI/ TCP-IP Model
